Projects

Waitlist Application for Product Launch (Jul 2024)

Developed a customer waitlist system where users could sign up with an email, receive a unique referral link, and advance in the queue based on successful referrals. The system featured dynamic position tracking and email notifications for top-ranking users, including distributing coupons to those who reached the first position. Additionally, I built an admin dashboard to manage the waitlist, providing customer insights and enabling **CRUD** operations for effective management.

Technologies used: React.js, Node.js, Express.js, MongoDB
